

Istiaque Ahmed

AI Engineer • Technical SEO

Vilnius, Lithuania

LT residence permit | eligible to work

+370 6486 1996 • iah.utshox@gmail.com • istiaque.cv

linkedin.com/in/istiaque-ahmed-ish • github.com/Utshox • Upwork (Top Rated Plus)

I build data-driven systems end to end and ship them to production. Two tracks, one toolkit: machine learning and LLM applications (deployed on AWS, monitored, evaluated with real statistics), and technical SEO that earns organic growth. I have an MSc in Informatics with an AI focus from Vilnius University, a published research result, and six years of client work where the model or the site had to keep working after I left. Python and SQL across the stack.

150% avg organic growth

Experience

Freelance AI Engineer & Technical SEO

2020 – Present

Upwork & Direct Clients (Top Rated Plus)

Remote

- Top Rated Plus on Upwork: 73 jobs, \$40K+ earned, 673+ hours, 100% Job Success, verified Vilnius location.
- Build and deploy ML, LLM, and web systems from idea to production to monitoring; work directly with founders and product owners to turn business goals into things that ship and stay up.
- Own organic search as a channel for B2B and e-commerce clients: technical audits, site architecture, migrations with redirect continuity, content systems, and reporting in GA4, Search Console, and Ahrefs.

SEO Strategist & Technical Content — B2B

Oct 2021 – Present

Pro-Tech Systems Group

Akron, Ohio (Remote)

- Run search performance end to end for a technical site in industrial automation and SCADA cybersecurity, a high-trust vertical where every claim has to be defensible.
- A SCADA-attack article earned **27,879 impressions and 179 clicks in 3 months**, ranking against established cybersecurity publishers; content here earns **Google AI Overview citations** (GEO/AEO).
- An A/B test on a landing flow lifted **clicks 23%** and **time on page 19%**.

AI Researcher — Master's Thesis

Sep 2023 – Jun 2025

Vilnius University | presented at eStream 2026

Vilnius, LT

- Patch-based semi-supervised deep learning for pancreatic cancer CT segmentation (281 patients); a severely imbalanced, rare-positive problem evaluated with Dice/IoU rather than accuracy.
- Semi-supervised model **beat the supervised baseline by 5.9 Dice points on a fully external 80-patient cohort** (paired Wilcoxon $p < 10^{-8}$, Cohen's $d = 0.74$, bootstrap CI excluding zero).
- Caught and fixed a train/test leakage bug in my own results, re-split on patient IDs, and reported the honest number; wrote the statistical testing pipeline myself. Distributed training on a SLURM HPC cluster. Oral talk at eStream 2026.

SEO Content & Web Admin

2025 – Present

Milestone Inspections

Remote

- Took a new domain to organic visibility: geo-targeted service pages, structured data, and Core Web Vitals work (95+ Lighthouse); enquiries arrive through lead forms I built and track.

SEO Specialist

Nov 2022 – Oct 2023

Sylloo

Dhaka, Bangladesh

- Built the SEO process from scratch for an e-commerce SaaS platform: technical audits, keyword and category-page strategy, on-page implementation, internal linking, and reporting across product, content, and engineering.

Selected Projects

llm-on-aws — retrieval-augmented QA service

github.com/Utshox/llm-on-aws

RAG API on AWS Lambda + API Gateway with the embedding index in S3. Live endpoint; answers stay grounded in source documents and decline what the data does not cover. Zero-dependency Lambda, deployed from a single script.

Production RAG chatbot — live for a paying client

pteinc.com

Retrieval chatbot in active use at a B2B client, grounded in 102 scraped pages and 1,133 knowledge chunks. Chat, lead-capture, and health APIs as microservices, with live monitoring of retrieval quality, latency, and conversion.

business-workflow-agent — agentic AI

github.com/Utshox

LangGraph agent that chains tools, routes conditionally, and pauses for human approval before acting. Benchmark scenarios and a LoRA fine-tuning evaluation track, built in code for full control and observability.

Deal Scout — Android app (Kotlin, Jetpack Compose) personal product

Surfaces nearby chain-store deals using the Google Places SDK and Gemini-grounded extraction, with categories, wishlist, and a cost tracker. Shipped solo, end to end.

Streaming & language-learning apps — Android / Kotlin personal products

A Jetpack Compose streaming app for Android TV (OkHttp connection pooling, fast channel switching) and a Duolingo-style Lithuanian course app with a custom mascot and Gemini-wired lessons.

Technical Skills

ML & data Python, SQL, NumPy, Pandas, scikit-learn, PyTorch, TensorFlow/Keras; supervised & unsupervised modelling; statistics (hypothesis testing, bootstrap CIs, calibration, leakage-safe validation).

LLM & agents RAG pipelines, embeddings, prompt engineering, LangChain, LangGraph multi-agent orchestration, human-in-the-loop; Gemini, GPT, Claude, Mistral.

Cloud & deploy AWS (Lambda, API Gateway, S3), Docker, FastAPI, REST & batch serving, Git/GitHub, GitHub Actions CI/CD, production monitoring.

SEO & web Technical audits, migrations, site architecture, Core Web Vitals, structured data, GEO/AEO; GA4, Search Console, Ahrefs, Screaming Frog; WordPress, Elementor, Shopify.

Languages English (fluent, Upwork Native/Bilingual), German (basic), Lithuanian (basic).

Education

MSc Informatics (Artificial Intelligence)	Sep 2023 – Jun 2025
Vilnius University	Vilnius, Lithuania
BSc Computer Science & Engineering	Sep 2016 – Mar 2021
Daffodil International University	Dhaka, Bangladesh
